

Botox and Juvederm

North Texas Dermatology is proud to announce that Dr Allison Singer is now offering Botox and Juvederm!

What is BOTOX?

Botox is a prescription medicine that temporarily relaxes the muscles between the eyebrows that lead to frown lines and wrinkles.

What is JUVEDERM?

Juvederm adds volume to smooth away facial wrinkles and folds. Juvederm smooths out the lines along the sides of your nose and mouth for up to one year with only one treatment. Kiss those "parenthesis" goodbye!

Please ask our experienced Patient Coordinators for assistance and to schedule your consultation today!
